Saltwater Disposal Well Trial

Dewey County

Summer 2016

	Initial Data	3 rd week	% Reduction
Total Soluble Salts	73,700 ppm	25,300 ppm	65%
Electro-Conductivity	115,000 umhos/cm	39,600 umhos/cm	65%
Total Chlorides	29,900 mg/kg	5,400 mg/kg	82%

This trial was, solely, done to prove to an SDW owner that Edwards Environmental Corporation (EECORP) was capable of remediating this site, or any other site that they may own, for saltwater or hydrocarbons and do so in a timely manner. The trial site was an area with 2" of soil overlaying an area of compacted gypsum. Bermuda grass was beginning to grow over the treated area by the 3rd week. The trial was discontinued after just 3 weeks as we proved our point. All testing was performed by Environmental Testing, Inc. /Oilab, Inc.
